

1 We had testimony in the committee by the Speaker
2 of the House that the present number of the House is a
3 workable unit. We have heard testimony by the editorials
4 to the Star and the Post and the Baltimore Sun that the
5 present session just passed was a workable and recognized
6 as a legitimate legislature, and one that we should be
7 proud of in the State of Maryland.

8 Unfortunately, I do not understand some of the
9 testimony that was given, or some of the arguments that
10 were given yesterday, that we do not know what is happening
11 to bills. I served with a blind man from Allegany County
12 who knew where the bills were, and I am sure that anyone
13 with good sight can look at the dockets and find out where
14 a bill is at any given time.

15 I certainly disagree with the delegate from
16 Ann Arundel County that no debate is effective on the floor.
